Ex-Collector Van Ness of your city is also take stating the accounts of his aliministration of the office, and it may be looking sitter the balance promised in the way of a foreign mission for resigning in tayor of another. It seems to be settled that Mr. Davis is to be Speaker, and yet something tells me that he will not get it. He has been here long enough, it is supposed, to have the thing cut and dried, to save the Members the trouble of the country to be comparable to the country and members the states of the country and the same than the country and yet some and the save the Members the troube of exercising their own judgments. I sam instaken if some of the Loco-Focos will submit to this kind of Democracy. Fisk and Dow, of the U. S. Journal, think that they are sure of getting the Frinting of both Houses. Now is it not atrange that a party professing itself in love with the people, will not put the printing up to the lowest bidder! If any one sets it for services to the party. I know not who can have a better right to it than Father Ritchie. If there was any Democracy in the Loco-Focoparty, they would let the people get their work done at the cheapest rate.

These that a good deal of bad feeling has been created against Mr. Ritchie, on account of a letter which it is said has been found, which he wrote some time since, pledging himself to go for Mr. Calhoun for the Presidency in 1845. Several of the Van Buren men here think that it is scarcely worth while to struggle hard for his election as Frinter. If his position is to be used to crush the Van Buren Wright interest in the next campaign.
